<b>A brief description</b> of the research directions pursued by the supervisor (a few sentences describing the scientific/artistic specialization; main research problems; scientific interests) and a possible link to the website/research team	<p>Developing knowledge about fundamental regularities of behavior, with the main focus on human choice and decision making. Basic research conducted at DecisionLab focuses on examining and explaining human behavior in various environmental contexts.</p> <p>We study the effects of delay, risk, and effort on behavior. The leading theme of the Center’s work is basic research in behavioral economics, with particular emphasis on discounting processes and valuation of goods accompanied by various types of costs.</p> <p>I encourage candidates to review my publications. I am also interested in research on specific populations (e.g., addictions) and/or behaviors (e.g., pro-environmental behaviors) from the perspective of choice. Using Google Scholar, research topics can be searched, for example, with keywords such as: delay discounting, effort-based decision making, intertemporal choice modeling, effort paradox, nudging, boosting.</p>
<b>Thematic areas</b> of planned doctoral dissertations	<p>Decision making (basic research), choice behavior, choice modeling and behavior prediction, and research on individual differences in decision making. Examples include:</p> <p>changing attitudes (e.g.: health, sport, financial domains) from the perspective of delay discounting research</p> <p>cognitive and physical effort: costs and benefits</p> <p>the process of choice in the effort domain</p> <p>modeling choices with delayed and risky outcomes</p>

	effectiveness of behavioral interventions from the perspective of individual differences and fundamental laws of choice
